**User Manual** 

NKTEL Communication Co.,Ltd http://www.nktel.cc

# Introduction .....

NKTEL Limited would like to thank you for purchasing this mobile phone.

#### **Dual SIM card**

Your phone support dual sim cards and these two sim cards be on line at the same time.

# **Power media applications**

- Music player & FM Radio
- Video player & recorder
- Webcam

#### **Bluetooth**

With Bluetooth 2.0 supporting A2DP profiles, enjoy handsfree conversations.

#### FM radio

Your phone is equipped with a radio with RDS functionality. You can use the application as a traditional radio with saved channels. You can listen to it while running other applications.

# 1 General Information

# Internet address: www.nktel.cc

**Services**: contact with your supplier or go to our Internet site. On our Internet site, you will find our FAQ (Frequently Asked Questions) section. You can also contact us by e-mail to ask any questions you may have.

Your telephone is a transceiver that operates on GSM networks with 850, 900, 1800 and 1900 MHz bands. This equipment is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

# Protection against theft (1)

Your telephone is identified by two IMEI (phone serial number) shown on the packaging label and in the product's memory. We recommend that you note the number the first time you use your telephone by entering " \* # 0 6 # " and keep it in a safe place. It may be requested by the police or your operator if your telephone is stolen. This number allows your mobile telephone to be blocked preventing a third person from using it, even with a different SIM card.

#### **Disclaimer**

There may be certain differences between the user manual description and the phone's operation, depending on the software release of your telephone or specific operator services.

(1) Contact your network operator to check service availability.

#### 1.1 Introduction

The phone is designed for GSM/GPRS network environment. Apart from calling, it also provides some practical functions, such as associative English input method, card-folder phonebook, individualized sound and pictures of incoming calls, 64 polyphonic ringtone, SMS & MMS, camera & video recorder, music & media player, voice recorder, clock, alarm clock, calculator, automatic turn-on & turn-off, scheduler management, T-flash, GPRS, STK, keypad lock, USB, pickup camera, Bluetooth. Moreover, its individualized user interface and functional design can meet your various requirements.

The phone is designed in accordance with the technical specifications of GSM/GPRS. It also obtains authentication of domestic and international authorities.

Manufacturers reserve the right to revise this manual without giving advance notice.

# 1.2 Safety

If your phone has been lost or stolen, contact telecommunication department or its agencies so as to forbid the use of your phone and SIM card. Your prompt action can prevent others from personator calls which will result in your pecuniary loss.

When you contact telecommunication department or its agencies, they will require IMEI code. The IMEI code is printed on the label of the phone back and you can see it when you remove the battery. You should copy the code and keep it properly for future need.

In order to avoid the misuse of your phone, you shall take the following measures:

- Set PIN code of your SIM card and alter it before others have known it.
- Do not put your phone in the visible places before you leave the car.
   You'd better keep it with you or lock it in the boot.
- Set Call Barring.

# 1.3 Warning and Notice

For your safe and proper use of the phone, read these guidelines before you use the phone.

# 1.3.1 Basic Notices

- Do use the batteries and chargers approved by the manufacturer. The disapproved products may cause battery leakage, overheating, burst or fire.
- Do not strike, shake or sling your phone. It can prevent damage or fire.
- ◆ Do not place your phone, battery or charger in microwave oven or

- Do not place your phone, battery or charger in microwave oven or high-voltage equipment; otherwise it may cause accidents, such as circuit damage or fire.
- ◆ Do not use your phone in the place where there is inflammable and explosive gas; otherwise it may cause your phone failure or fire.
- ◆ Do not put your phone in the place of high temperature, high humidity or the place where there is a lot of dust; otherwise it may cause your phone failure.
- ◆ Keep your phone out of the reach of children. It can prevent children from playing your phone as a toy and the subsequent body injury.
- ◆ Do not place your phone at the unsmooth or unstable table; otherwise your phone may fall from the table and get damage.

# 1.3.2 Notices of Your Phone

- Turn off your phone in any facility where using mobile phone is forbidden. These facilities may include airplanes and hospitals. The phone can influence the regular operation of electronic devices and medical devices. Therefore, any use of the phone must be in accordance with applicable regulations of the facility. Your phone is of automatic turn-on function. You should check the setting of clock alarm in order to ensure your phone will not be automatically turned on while the airplane is flying.
- ◆ Do not use your phone in the place of poor signal or near the electronic devices of high definition. The interference of radio wave may cause electronic devices' misoperation or other problems, especially to audiphones, pacemakers and other medical electronic devices, fire detectors, automatic doors and other automatic control devices. You can consult the manufacturer or seller of the medical device about the influence of the phone on the pacemaker or other medical devices.
- Do not press the LCD strongly or strike other things with your phone; otherwise it can cause damage to LCD or leakage of LCD liquid. If LCD liquid accidentally gets into your eye, you may become blind. At this very moment, do not knead your eye. You should immediately wash your eye with water and then go to hospital.

- ◆ Do not dismantle or refit your phone; otherwise it will cause damage to your phone, leakage of electricity and circuit failure.
- ◆ In few situations, your phone may have bad influence on electronic devices in some car. Do not use your phone so as not to lose security.
- Do not press the keys with sharp things, such as needle or nib; otherwise it may cause damage to your phone or misoperation.
- Do not use your phone if its antenna is damaged; otherwise it may cause injury to the person.
- ◆ Do not put your phone too near magnetic objects, such as the magnetic card; otherwise the radiation wave of the phone may eliminate the information stored in floppy disk, debit card and credit card
- Do put the small metal objects such as thumbtack far away from the earphone because the loudspeaker is magnetic while it is working and it can attract these small metal objects. It may cause injury to the person or damage to the phone.
- ◆ Keep your phone dry. If water or other liquid gets into the phone, it may cause overheating, leakage of electricity or failure of your phone.

# 1.3.3 Notices of Battery Use

- Do not cast the battery into the fire; otherwise it can cause fire or burst.
- ◆ Do not install the battery strongly; otherwise it can cause leakage of electrolyte, overheating, burst or fire.
- Do not short-circuit the battery with metal objects, such as electrical wiring or needle. Do not put the battery together with metal objects such as necklace; otherwise it may result in leakage of electrolyte, overheating, burst or fire.
- ◆ Do not weld the positive (+) and negative (-) of the battery; otherwise it may result in leakage of electrolyte, overheating, burst or fire.
- ◆ If battery electrolyte accidentally gets into your eye, you may become blind. At this very moment, do not knead your eye. You should immediately wash your eye with water and then go to hospital.
- Do not dismantle or refit the battery; otherwise it can cause leakage of electrolyte, overheating, burst or fire.

- Do not use or put your phone near the fire or in the place where is of high temperature; otherwise it can cause leakage of electrolyte, overheating, burst or fire.
- ◆ If the battery is calefactive, color-changing or transformative while is it is charging, using or preserve, do stop using it and change a new battery.
- ◆ If battery electrolyte contacts skin or clothes, it may burn the skin. Do wash the skin with water immediately and go to hospital if necessary.
- ◆ If electrolyte leaks out of the battery or send out strange smell, put the battery far away from the fire immediately in order to avoid fire or burst.
- ♦ Keep the battery dry; otherwise it can cause overheating, smoking or erosion of the battery.
- Do not use or put the battery in the places of sunlit or high temperature; otherwise it can cause leakage of electrolyte or overheating. Moreover, it can reduce the capacity and lifetime of the battery.
- Do not charge the battery continuously over 24 hours.

# 1.3.4 Notices of Charger Use

You can use **Charger** or connect it to PC for your phone with **USB** cable.

- ◆ Do use alternating current of 220V. Using other voltage can cause leakage of electricity, fire or damage to your phone and the charger.
- ◆ Do not short-circuit the charger; otherwise it can cause electric shock, smoking or damage to the charger.
- ◆ Do use the charger while the power line is damaged; otherwise it can cause fire or electric shock.
- Do wipe the socket and remove the dust in time
- Do not place the container filled with water near the charger; otherwise it can cause overheating, leakage of electricity and failure if water spills out.
- ◆ If the charger accidentally contacts water or other liquid, you should immediately unplug the charger so as to avoid overheating, fire, electric shock or failure of the charger.
- Do not dismantle or refit the charger; otherwise it can cause electric shock, fire, damage to the charger or injury to the person.

- Do not use the charger in the place of high humidity, such as bathroom;
   otherwise it can cause electric shock, fire or damage to the charger.
- ◆ Do not touch the charger, power line and socket with wet hand; otherwise you can get an electric shock.
- ◆ Do not put heavy things on the power line or refit the wire; otherwise it can cause electric shock or fire.
- Do unplug the charger before you clean and maintain it.
- Do Hold the charger if you unplug it. Do not pull the power ine. It may damage the wire and cause electric shock or fire.

# 1.3.5 Care and Maintenance

- Your phone, battery and charger are not waterproof. Therefore, do not use them in the place of high humidity, such as bathroom. They should also avoid shower.
- Do clean your phone, battery and charger with the soft and dry cloth.
- Do not wipe your phone with alcohol, diluents or benzene.
- ◆ Do wipe the socket regularly. The dirty socket can result in bad contact, unsteady power and no recharge.

#### 1.3.6 General Notices

#### The Phone

- ◆ Your phone must be used in the places where the temperature is below 40°C and above 5°C and the humidity is below 85% and above 35%.
- ◆ Do stay way from telephone, television, and radio and office automatic instrument while you are using the mobile phone. It can prevent the interference of your phone and the abovementioned instruments.

# The Battery

- Do put the battery in the ventilated place and keep it away from the sunlit place.
- ◆ The battery is of limited lifetime and frequent charging can reduce its capacity. If the battery cannot be charge, change a new approved battery.
- Do not dispose of the battery as household waste. The battery must be disposed of in accordance with the regulations.

# The Charger

◆ Do not charge the battery in the following places: the sunlit place, the place where the temperature is below 40°C and above 5°C, the place of humility, dust or severe shake and the place near the television, radio or other electrical appliances.

#### Radio waves

Proof of compliance with international standards (ICNIRP) or with European Directive 1999/5/EC(R&TTE) is required of all mobile phone models before they can be put on the market. The protection of the health and safety for the user and any other person is an essential requirement of these standards or this directive.

THIS MOBILE PHONE COMPLIES WITH INTERNATIONAL AND EUROPEAN REQUIREMENTS REGARDING EXPOSURE TO RADIO WAVES.

Your mobile phone is a radio transmitter/receiver. It was designed and manufactured to comply with the radiofrequency (RF) exposure thresholds recommended by international requirements(ICNIRP) (1) and by the Council of the European Union (Recommendation 1999/519/EC) (2). These limits are part of a set of requirements and establish authorised radiofrequency levels for the public. These limits were established by independent groups of experts on the basis of regular and detailed scientific assessments. They include a significant safety margin intended to ensure the safety of all, regardless of age or state of health.

The exposure standard for mobile phones is determined by a measurement unit known as the Specific Absorption Rate or "SAR". The SAR limit is set by international requirements or by the Council of the European Union at 2 watts/kilogram (W/kg) averaged over 10 grams of body tissue.

The tests used to determine SAR levels were carried out on the basis of standard usage modes with the phones transmitting at their maximum power level over the entire range of frequency bands.

Although the SAR was established at the highest certified level, the actual SAR level for the mobile phone during use is generally much lower than the maximum values. In fact, since mobile phones are designed to operate at many different power levels, they only use the minimum level of power required to provide a connection to the network. In theory, the closer you are to

a base station antenna, the lower the power level required by the mobile phone.

- (1) The ICNIRP requirements are applicable in the following regions: Central America (except Mexico), South America, North and South Africa, Pacific Asia (except Korea), Australia.
- (2) The European recommendation (1999/519/EC) is applicable in the following regions: Europe, Israel.

The highest tested SAR value for this mobile phone for use at the ear and compliance against the standard is 1.08 W/kg. While there may be differences between the SAR levels on various phones and at various positions, they all meet the relevant International guidelines and EU requirements for RF (radio-waves) exposure.

The World Health Organisation (WHO) considers that present scientific information does not indicate the need for any special precautions for use of mobile phones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep mobile phones away from the head and body (fact sheet n° 193). Additional information about electromagnetic fields and public health are available on the following site:

http://www.who.int/peh-emf.

Although no danger relating to the use of telephone was ever proved, the World Health Organisation advises as a precautionary measure to use your telephone with a good level of network reception as indicated on the telephone display (4 to 5 bars). It is also advised to keep the telephone, during communications, away from the belly of pregnant women and from the lower abdomen for teenagers.

Your telephone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As mobile devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset or usb data cable. If you are using another accessory ensure that whatever product is used is free of any metal and that it positions the phone at least 2cm away from the body.

# **2 Getting Started**

# 2.1 The Display Screen

In idle mode the LCD may display the following icons.

Icon	Description
Pail 1	SIM Card 1 Signal Strength
Pall	SIM Card 2 Signal Strength
	Vibrator is activated
XII	SIM Card 1 New SMS
X	SIM Card 2 New SMS
	SIM Card 1 New MMS
	SIM Card 2 New MMS
Ω	Alarm clock is activated
n	Headset is inserted
1	SIM Card 1 is missed call
760 188	SIM Card 2 is missed call
<u> </u>	The keypad is locked.
	Battery Level
*	Bluetooth is activated

# 2.2 Keys

Name	Description
Left/Right Function Key	These two function keys depends on the menu at the bottom of screen, like OK, Return.
Power Key	Terminate call
	Press down and hold to switch on or off
	To return to idle screen from function list

Dial1& Dial2 Key	Making call out(sim1 or sim2) or answer incoming calls  To browse call history from idle screen.
OK Key	Confirm function in some menus.
Direction Keys	To scroll in function list or phone book.  To scroll cursors in user edit status  To enter the specific function from idle screen
Number Keys	To input numbers, letters and symbols.
# Key	To switch between current mode and silent mode in idle screen.  To switch input modes in user edit status  To increase the volume in MP3 /FM playing.
* Key	To input symbols in user edit status.  To input "+", "P", "W" when dialing numbers.  To decrease the volume in MP3/FM playing.

# 2.3 Battery

The initial state of battery charge of about 50% the electricity. The first three complete charge please run out of power after the full use of this battery easy to achieve the best use of state.

# **Install and Remove the Battery**

You should follow these steps to remove the battery: Open the battery back; Remove the battery from back-end mobile phones.

You should follow these steps to install the battery: Insert the front-end of the battery into the phone; Put the rear cover back.

# **Charge the Battery**

- Plug in the charger.
- Insert the connector plug into the connector port on the bottom of your phone.
- ◆ Then the Battery Level icon displays in top right corner of the screen will flicker regularly. If your phone is power off, a charge indicator will display in the screen and indicates that the battery is charging. If the battery is too

- low the charge indicator will display in the screen for a moment.
- When the icon is full and does not flicker, it indicates that the battery is completely charged. If your phone is power off, the system will display "charging complete". The charging process usually spend 3-4 hours. In the process of charging your phone, battery and charger will become hot that it is a normal phenomenon.

#### Notice:

The phone must be charged with the approved charger in the ventilated places where temperature is below 40°C and above 5°C. The use of any other disapproved battery may invalidate any warranty, and may be dangerous.

When your phone is automatically turned off or indicates the power will be exhausted, you should charge the battery in time. If the battery is not exhausted, the charging time will be shorter than the normal time.

The data of suspended time and talk time is provided by manufacturer is based on the ideal working environment. But actual working time depends on the network environment, working environment and usage method.

Do check if the battery has been well installed before charging. Do not remove the battery while charging.

Remove the connection between charger and batter after the battery is completely charged.

If you do not remove the connection between charger and batter, the battery will be charged in 5-8 hours. We suggest that you don't do it, because it can shorten battery lifetime.

# 2.5 Network Connections

# 2.5.1 SIM Card

You must insert an effective SIM card into your phone before you use the phone. SIM card into your digital GSM network key.

All the information of network connection and the initial call record is stored in the metal area of SIM card. It also stores your phonebook and SMS. SIM

card can be removed from your phone and used in any mobile phone of GSM network. (The new phone will automatically read the SIM card)

In order to avoid the SIM card information will be lost, you should put SIM card far away from the place of electricity or magnetism and do not touch the metal area of SIM card. Once SIM card is damaged, you cannot logging in GSM network.

Caution: Do turn off your phone before you remove SIM card. Do not insert or remove SIM card when the phone is power on; otherwise SIM card can be damaged.

#### 2.5.2 Insert and Remove the SIM Card

SIM card is usually placed in a card. You should take it out carefully before you insert it into your phone.

- Turn off your phone and remove the battery or external power.
- Insert SIM card into the card slot as shown below
- When you want to remove SIM card, turn off your phone and remove the battery. Then you can take out SIM card.

## 2.5.3 Turn Your Phone On or Off

Press and hold Power Key to turn on your phone. Do the same thing to turn off your phone.

If you have not installed SIM card, your phone will request you to insert SIM card. The phone check if the card can be used after the card has been installed. Then the screen will display the following indications sequentially.

- ◆ Input SIM1(2) PIN: was set up SIM password..
- ◆ Input Phone lock code: was set up cell phone password.
- ◆ **Searching:** phone will search until found a suitable network connention.

### 2.5.4 Phone unlock

In order to prevent the illegal use your mobile phone can be set up password-protected. Elected to user this feature, you must enter a password so you can unlock the phone when you turn on phone every time, and send or receive calls. You can remove passwords(see the "Security setting"). In this case, the phone can not prevent the illegal use of.

◆ Enter the password phone, Delete key can clear input error. For example,

- if the phone password is set to 1122, you must enter "1122".
- If you forget your phone password, you must contact your local retailer or authorized service center, in order to unlock your phone password.

#### 2.5.5 Unlock the SIM Card

In order to prevent the illegal use, SIM card PIN1 (personal identification number) code encryption protection. Elected to user this feature, you must enter PIN 1 code to unlock SIM card when you turn on phone every time, and send or receive calls. You can remove the S protection IM card (See Security setup). In this case, the SIM card can not prevent the illegal use of.

- By hanging up the phone key to open.
- ◆ Enter PIN 1 code and then select Confirm. Delete key can clear input error. For example, if the PIN 1 code is set to "1234", you should enter "1234".

If three consecutive input error, your SIM card will be locked Network. Phone will be asked whether the PUK 1 code. If you do not know PUK 1 code, do not enter on its own, SIM card should be paid to deal with network operators(See Security setup)

Notice: The network operator suppliers for you SIM card to set a standard of PIN1(4 to 8), You as soon as change to your private password(See Security setup)

## 2.5.6 Connect to the Network

If SIM card is success in unlock, phone will automatically search for an effective network. Once contacted, the network provider's name will appear on the screen.

Notice: If the screen displays "EMERGENCY", Means that you don't in network service's coverage area. But you can still send an emergency call according to the signal strength.

### 2.5.7 Make Calls

When the network provider's logo appears on the screen, you can call or answer the phone. The icon be displayed in the top left corner of screen is the network signal strength.

The barrier can influence call quality. Therefore, You can mobile in small area so that effectively call quality.

#### 2.5.8 Make Domestic Calls

Press Number Keys to enter the phone number and then press send button to begin to call. If you want to change the number, press Delete Key to delete the number. The screen will show animation while dial-up call. After answer each other, the screen will show call state. If you have set extra tone, you will hear ring tone.( network support)

Press End Key to hang up the call.

Dialing Code Phone Number Dial-up button

#### 2.5.9 Dial Extension

Some fixed-line extensions can not dial directly, You need to dial the switchboard, dial extension. If you insert "P" between the switchboard number and the extension number while entering the phone numbers, the phone will automatic dial-up extension. Press and hold "\*" Key to input "P".

# Dialing Code fixed-line telephone number P extension number Dial-up button

For example, if you have a number 8880000 to use a dial-up voice-mail system, mail for the 6666 and 8888 for the password, well ,you can dial in the following manner:

8880000 P 6666 P 8888

The first part of number is dial-up voice-mail system.

After telephone response, send 6666 to choice voice-mail.

Before number 8888 is sent out the second "P" will have a 5 seconds delay.

# 2.5.10 International telephone Calls

When you want to make international call, you may keep pressing "\*" key till the screen displays international long-distance telephone prefix symbol "+". his allows you to dial a number from any country even unknowing prefix number (e.g. which in china is "86")

With prefix number inputted input your desired district number and complete phone number. The country code in accordance with usual practice. For example, district number of Germany is 49, that of UK is 44, and of Sweden is 46, etc.

For example: to dial hotline for service, you should dial:

+86 21 114

+ County Code Phone Number Dial-up button

# 2.5.11 Dial the Numbers of Phonebook

Every call you dialed or received can be saved and listed in your phone. The recent dialed and received calls are on the top of the list (See **3.5 Call Center**). Every dialed call, received call or missed call is listed in dialed calls group, received calls group or missed calls group respectively. You can view all the call records. When the groups are full, the old records will be automatically deleted. You should follow these steps to view the list.

- Press Call Key to view Call history
- ◆ All the numbers in the list can be directly dialed by pressing Call Key.

You can select **ok** to view detailed information of the chosen number. Enter **Options** and select **Save to Phonebook** to save the chosen number in your phonebook.

# 2.5.12 Emergency Number

If you are in network service's coverage area (check the upper left corner of the screen mobile phone network signal strength), you can make an emergency number. If your network provider fails to provide roaming service on such location, the screen will display "EMERGENCY" and you can only make an emergency numbers. If you are in the network coverage area, you can call emergency numbers without SIM car.

# 2.5.13 Answer Calls

If you set "press any key to answer a call", then pressing any key will answer a call (but don't press the "Back key" and "end key"), Otherwise, you have to press Call Key or OK Key to answer call. If the headset has been inserted, you can press the headset button to answer the call. If it's not convenient for you press button, can be set to auto answer. Then your phone, if the headset has been inserted, in the ringing tone or vibration after 5 seconds, telephone automatically connect

#### 2.5.14 Call Records

Your phone can record the latest call record and the total call duration.

## 2.5.15 Call Menu

Select **H-Free** to activate **Hands-Free** function or **Options** to enter **Options Menu**. The operation is the same as that of function menu. Such call menu can only be seen during a call , and call waiting, call holding, and multi-parties conference need network support, please contact your network service provider.

Select Options Menu to perform the following operations.

# ♦ Hold/Retrieve single call:

Hold a current call or resume a held call.

# **♦** End single call:

End a current call.

## New Call:

Call new call(s).

#### Phonebook:

Allow you to search a number in your phone book.

# Message Center:

Edit and send a message.

# Sound recorder:

For audio record, long press "volume up key" to activate recorder function during a call.

#### Mute:

Not to send (send) local voice.

### DTMF:

Press "left soft key" to activate or deactivate dual

# **3 Function Menus**

### 3.1 Use of Function Menus

# **Scroll Searching and Selection Function**

Press MENU key to enter Function Menus in idle mode.

In all the main menu or submenu level, the OK key to choose functions.

#### **Exit Menus**

Generally, you can press Back Key to exit from some menu item. Press End Key to return to idle mode.

Note: In the idle interface, press the back key to enter the phonebook contact list

# 3.2 Introduction of Function Menus

The default menu function is structured as follows:

# **PIM** (Personal Information Management)

- 1. Phonebook
  - 1.1 Quick Search
  - 1.2 Search Contact
  - 1.3 Add New Contact
    - 1.3.1 To SIM 1
    - 1.3.2 To SIM 2
